Dimplexrenewables®
An endless supply of energy

- Excellent reliability, Product warranty of 5 years
- 90% performance for 10 years
- 80% performance for 20 years
- Produces energy from daylight not sunlight
- Easy installation, all parts included in the kit
- **KITS AVAILABLE FROM**
1.38kW (6 module) to 5.52kW (24 module)

Polycrystalline PV Solar Packs

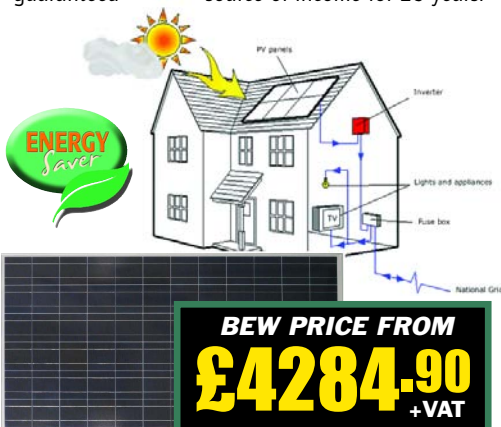

Photovoltaic's for domestic and light commercial electricity

The kits offer a complete PV solution for residential and light commercial buildings, providing clean, locally-generated energy and reducing carbon emissions.

Using free energy from the sun to produce electricity, Dimplex solar PV panels produce their energy from daylight, rather than solar radiation, meaning energy is produced even on cloudy days. Suitable for homes, businesses, schools or community buildings and with no moving parts, solar PV provides one of the easiest and most reliable ways to future proof against rising energy costs whilst reducing CO2 emissions.

The kits contain everything that's needed to install and connect the modules, including G83 approved inverter, roof mounting system, cabling, isolators and generation meter. The hardware is MCS-accredited so the kits are eligible for the feed-

in tariffs when properly installed by an MCS-accredited installer. This will allow homeowners, businesses and public sector organisations to take advantage of a generation tariff of up to 41p per kWh for locally-generated electricity, providing a guaranteed source of income for 25 years.

OWNL[®] CM119 WIRELESS ENERGY MONITOR

*Saves you money and saves the environment
 Keeps an eye on your electricity usage at all times.*

*Easy to install, easy to read,
 easy to use.*

OWNL wireless electricity monitor shows you how much electricity you are using, how much it is costing you and how much carbon is being generated. This means you can see in real time the benefits of turning off electrical devices.

Whether it's turning off at the plug rather than the standby, or simply turning off a light, OWNL shows you the cash impact of changing your habits and behaviours which could amount to savings of hundreds of pounds per year.
